

## Advanced course on urethral stricture surgery

ESU Course 08

**Saturday, 12 March**  
**14:30 - 17:30**

**Location:** Room 13b (ICM, Level 1)

**Chair:** R. Inman, Sheffield (GB)

### **Aims and objectives of this presentation**

To update on latest advances and evidence for treatment for male urethral stricture disease including

- Investigations and assessment
- Minimally invasive and endoscopic treatment
- Urethroplasty for anterior urethral strictures (Penile and bulbar strictures)
- Surgery for posterior urethral strictures (Pelvic fracture injuries)

The course will consist of lectures, reviews of the evidence regarding treatment of strictures and interactive case discussions to illustrate decision making.
