Aims and objectives of this presentation
This course will cover all principal indications for robotic surgery of the upper urinary tract. The standard techniques will be explained on a video-based fashion and will be followed by discussing advanced cases as well as troubleshooting and complication management. On top of that, technical innovations and new applications will be discussed as well.

Don’t miss this course, a must for all robotic surgeons!

• Videobased step-by-step approach
• Standard techniques
• Complex cases
• Troubleshooting and complication management
• Technical innovations: What's new in robotics?
