ESU/ESUT Hands-on training in Laparoscopic suturing (anastomosis)

Location: Room South America (Hall B0, level 0)

Chair: D. Veneziano, Minneapolis (US)

Aims and objectives of this presentation

The aim of this advanced laparoscopic suturing course is to develop skill and knowledge about laparoscopic suturing. Supported by experienced laparoscopist and state of the art Laparoscopic technology, you can improve your suturing skills, shorten your learning curve with the help of HD vision and practice an anastomosis. An intermediate level in laparoscopy is mandatory for this course.
