ESU/ESFFU Hands-on training in OnabotulinumtoxinA administration for OAB

Location: Room Europe (Hall B0, level 0)

Chair: H. Hashim, Bristol (GB)

Aims and objectives of this presentation
Botulinum toxin type A administration in Urology has become common practice over the last two decades. Following the completion of Phase 3 registration trials in OAB, OnabotulinumtoxinA received marketing approval for this indication and now has a standardised injection paradigm. This course is procedure-focused, and will teach attendees the practicalities of OnabotulinumtoxinA administration through short lectures, videos and hands-on demonstrations using bladder models. Attendees will learn how to reconstitute the product and see different types of equipment available.
