The EAU Exhibition is one of the premier events worldwide for showcasing new and established products as well as cutting-edge medical technology. High-profile companies as well as small innovative businesses join the exhibition – offering insights and opening the doors onto the world of modern urology.

• Today’s most current achievements in technology
• A glimpse into the future of pharmaceutical research and development
• A place where innovation meets application

These are only some of the reasons why you should explore this year’s EAU Congress exhibition.

And while you are there – don’t forget to visit the EAU booth, where we can answer any questions you might have about EAU membership and meetings.

Opening hours Exhibition:
Saturday 12 March : 09.15 – 18.15 hrs
Sunday 13 March : 09.15 – 18.15 hrs
Monday 14 March : 09.15 – 18.15 hrs

Boston Scientific: More than a medical company, Boston Scientific is a global leader in innovative medical solutions that improve the health of people around the world. We work collaboratively to develop, advance and commercialize innovative medical technologies that meet the unmet needs of healthcare providers and patients. Together, we create better possibilities in healthcare.

CHINESE UROLOGICAL ASSOCIATION
NO.42 West Dongsi Street, 100701, Beijing, China
T : +86-10-85954273
W : www.cn.uro.org
E : zijia@163.com, leige@china.cma.cn
Booth nr. : G06

The Chinese Urology Association (CUA) was the first Urological Association in new China founded in 1956 by the founders of Chinese Urology, academician Jingwu Wu. 35 years since the establishment of CUA, members of CUA forged ahead with enterprising spirit, with this spirit passed on to generations to generations. The members of CUA who are both realistic and innovative, exerted their utmost effort to attract worldwide attention and achieved great reputation. CUA has now become the largest urology association in China, academic in scientific, management and internationalization in its development, forging core strength in promoting the development of urology. The 10th CUA committee, including 64 members, was selected by voting in Beijing on December 22nd, 2015.

COGENIX MEDICAL
40 Ramlund South Road, Southbridge, Massachusetts, United States of America
T : +1 866233 2012
W : www.cogenixmedical.com
E : customerservice@cogenixmedical.com
Booth nr. : A03

Cogenix Medical is a global medical device company that designs, develops, manufactures and markets innovative proprietary technologies for the urology, ENT and GI markets.
The Urgent PC® Neuroendoscopic System delivers percutaneous bladder nerve stimulation (PNS) for the outpatient treatment of overactive bladder and fecal incontinence. Macroplasq® is an endoscopically delivered, injectable soft-tissue bulk agent used to treat stress urinary incontinence and vesicourethral reflux. Macroplastique® has been used in Europe for over 20 years on over 75,000 patients. PrimeSight™ Endo-System Endo-System revolutionizes the efficiency of quality patient care by combining high-performance endoscope and imaging technology with the EndoSheath® Protective Barrier, a sterile, single-use product with a hydrophilic channel. Cogenix Medical is a trading name for UBV Unipolysis and UBV Ltd.

COLOPLAST
C. La Bourdaisière – Hall Poitus, 33150 La Pessic Robinson, France
T : +33 140 895 881
W : www.coloplast.com
E : frfg@coloplast.com
Booth nr. : D50

For over 120 years, Coloplast has supported the medical progress through the development of the latest techniques and devices in cooperation with our surgeons partners in the field of:
– Endourology: a wide range of stone extractors, ureteral stents, access sheaths, balloon dilatation catheters and percutaneous nethrostomy sets
– Women’s Pelvic Health: sling and meshes to treat stress urinary incontinence and vesicourethral reflux
– Men’s Health: male sling, penile implants for treating erectile dysfunction, testicular implants
– General Surgery: a wide range of drains and a high quality irrigation device for fluid balance
– Lower Urinary: all disposable surgical devices required for handling prostate disorders and also addressing bladder and suprapubic drainage, urethral strictures voiding dysfunctions and other urological conditions
Coloplast is proud to provide you the best services, products and guarantees.
Together to care. Innovative surgical solutions
Curan Medical stands for great ambition and experience in percutaneous, laparoscopic, and open procedures performed successfully. The Curan product line comprises minimally-invasive devices and equipment used in laparoscopy, endoscopy, hemostasis, and tumor ablation. Endocare has initially concentrated on the development of devices for interventional therapies, and today it is a world leader in the development and commercialization of proprietary medical devices for the treatment of cancer and other diseases. Endocare provides new devices in the other fields of medicine. With its own R&D department, Endocare continually innovates and produces new devices in the other fields of medicine. With more than 10,000 clients worldwide, Endocare has proven record for its ability to deliver high efficiency and reliability: the Swiss LithoClast® principle meets industrial standards by developing devices of unequalled quality. With its own R&D department, Endocare continually innovates and produces new devices in the other fields of medicine. Consequentially, Renova offers more efficient organ coverage and a shorter treatment protocol of a few sessions only. Renova is the latest of high-tech treatment devices in urology offered by DierecGroup. DirecGroup marks over 30 years of pioneering Technology for Urology. The company is one of the worldwide innovators in the field of ESWL, and thermal therapy with systems installed in 75 countries worldwide. Direx presents the latest breakthrough technology, Linear Shockwave Therapy (LQST), the only shockwave technology specifically designed for ED treatment allowing optimal coverage of the entire corpus cavernosum.

The exhibit is open from 10 a.m. to 11 p.m. Renova has proven its efficacy and reliability: the Swiss LithoClast® principle meets industrial standards by developing devices of unequalled quality. With its own R&D department, Endocare continually innovates and produces new devices in the other fields of medicine.

The company’s leading product range consists of World’s First Flexible Intracorporeal Robot, Extracorporeal Shock Wave Lithotripsy (ESWL) Systems and Pneumatic and Ultrasonic & Pneumatic Combined Intraocular Lithotriptors for the treatment of intracanal tracts.

Elsivier is a world-leading scientific, technical, and medical information provider, enhancing the productivity of science and health professionals. Elsvier publishes: European Association of Urology, European Urology, The Journal of Urology and Urology Practice on behalf of the American Urological Association. With an extensive media spectrum — print, online and mobile — Elsevier is able to supply the information you need in the most convenient format.

Proreft is a patented dietary food for special medical purposes for the dietary management in case of limited fertility of men who want a baby. Due to its specific and unique composition Proreft® improves sperm health: sperm cell density, ejaculation volume, morphology, progressive and total motility. The patented combination of eight substances addresses all these issues that disrupt sperm cell quality. It also protects sperm from endogenous ROS and is therefore beneficial in reducing sperm DNA fragmentation. Efficacy of the patented formulation is clinically proven by various studies.

Booth nr. : E10
Lumenis is a global leader in the field of minimally-invasive clinical solutions within the Surgical, Ophthalmology and Aesthetic markets. We pioneered the development of high-powered holmium lasers for various urology applications, including the excision procedure for the minimally invasive treatment of bladder tumors. In addition, Lumenis is the only company that has been granted a market clearance in most major markets for removing small stones up to 1 cm in size, including the urinary bladder. With the use of our high-powered holmium laser to perform enucleation of the prostate, it has proven to be more effective than alternatives while minimizing collateral tissue damage and improving the lowest recurrence rates. In addition, the high-power, high-repetition holmium laser is an effective form of treatment for a broad range of urinary and kidney stones, enabling stone dusting, which reduces the stones to minimally-sized particles and allows them to be well cleared.

Nucleix Ltd. develops revolutionary non-invasive molecular cancer diagnostic tests. Our expertise is developing tests that include epigenetic biomarker panels, for highly accurate cancer detection. Bladder Epichex™ is a novel urine test for bladder cancer monitoring. It is based on a panel of 15 methylated biomarkers, multiplexed on a real-time PCR device. This test has shown 96% sensitivity, 86% specificity and 97% NPV on a cohort of 225 patients in post-TURBT monitoring. It is expected to reach the market in Q2 2016, and is currently undergoing additional validations in leading European urology centers in Germany, Netherlands, Italy and others. Our highly sensitive and specific tests are based on identification of changes in methylation patterns. Nucleix’s technology is based on a combination of a new biotechnical platform in conjunction with sophisticated statistical analysis. Nucleix is backed up by leading investors including, OrbitBio – one of the largest VGs in the medical field.

Olympus Medical Systems Corporation delivers innovative, minimally invasive, and clinically effective devices to meet the needs of urologists and their patients. Our current focus is the UroLift® System, a minimally invasive device designed to lower lower urinary tract symptoms due to benign prostatic hyperplasia (BPH). This unique technology has FDA clearance and NCIC, and directly opens the urethra without prostate tissue injury and offers a quality of life solution for patients. Take a moment to visit with us during the meeting to learn more about our minimally invasive, novel technology, we are located at stand E50.

RZ Medizintechnik GmbH – Progress in Surgery. The traditional family business was founded in 1946 by Rainer Zuberd in the world center of medical technology in Tuttlingen. Even today, it is run together with his son Tobias Zuberd and his third generation.

Since a high level of commitment and the target to develop, produce and market only highest quality instruments, RZ became a respected and competent partner in the medical business. All processes, from the development to manufacturing and distribution will be carried out by RZ with almost complete in-house manufacture. The company is based on three pillars. Instruments for open surgery, equipment, telescopes and instruments for endoscopic surgery as well as the service and repair division.

Today Righettis is an innovative, product-development company. Specialization in the development of quality products that fill a void in the solutions market, or may be found to be practical alternatives to existing products available only on a high-end basis. We strive to deliver innovation with quality, filling market gaps & unmet consumer demand cost effectively, always with the end user in mind.

Exhibition Guide
SANDOZ, the generic pharmaceuticals and biosimilars business of Novartis in the rapidly growing generics industry. Established in 1971, STORZ MEDICAL AG is a Swiss owned medical company in the KARL STORZ Group. Our products have proved their efficacy all over the world in the medical disciplines of urology, gynaecology, gastroenterology, cardiology and dermatology.

Today, the focus is on personalized stent management, making it possible to tailor each patient’s treatment to their own particular situation. With the development of the MODULITH® SLX–FOmniconcept, STORZ MEDICAL has shown the perfect service that perfectly combines the demands of a urological workstation with those of a lithotripter. For purely endourological workstations without a shock wave therapy unit, STORZ MEDICAL has an impressive solution in the form of the PRIMERA 360. With both devices, the large dynamic flat-panel detector allows overview imaging of the entire genitourinary tract in diagnostic quality.

Shock wave therapy also opens up a new area of application, namely vascular erectile dysfunction, CPPS and Peyronie’s disease.

SonarCare Medical is the leading innovator in minimally invasive ablation technology using highly intensied focused ultrasound (HIFU). SonarCare Medical’s probeless tissue ablation system, Sonablate®, incorporates HIFU technology into an integrated ultrasound (US) device to provide a complete, whole gland, hemi-gland, or focal prostate cancer treatment. Exclusive Sonablate fusion software fuses MRI images in real-time with ultrasonic images in order to facilitate an accurate ablation treatment plan, which helps to preserve quality of life functions in prostate cancer patients around the world.

SonarCare Medical was recognized by the company’s pioneering multi-modal console, which allows for surgeons to incorporate additional treatment probes, including a laparoscopic device. For more information, visit us at Booth 624.

SONY EUROPE LTD

Medical Enterprises Group develops innovative minimally invasive technologies providing benefits for both patients and healthcare systems. The lead product, Synergy® RITE (RF Induced Thermotherapy) device offers clinically effective, safe and easy to deliver deep tissue hyperthermia with Chemotherapeutic instillation for RMIBC. Synergy® has become a common practice worldwide to treat intermediate and high-risk patients who, in many cases, failed previous treatments or have no other available alternatives. Synergy® RITE reduces recurances and the need for repetitive surgical interventions and reducing the necessity for postyectomy, radiotherapy and/or expensive systemic treatments. Thousands of patients were treated successfully and over 30 scientific publications including RCTS published, proving its safety and efficacy.

SYNOPSYS EUROPE GMBH
Bonnbr. 1, 22583 Norderstedt, Germany
T +49 40 2360-0 W www.synopsys-europe.com E sales@synopsys-europe.com
Booth nr. : B15

Synopsys Europe GMBH is a subsidiary of the Synopsys Corporation based in Japan. For over 40 years, we have set standards and driven innovation in semiconductor design. We have also broken ground in medical and electronics, life science, biocircuitry, patient testing and automation. We are now among Europe’s top laboratory diagnostics and healthcare companies, and the global leader for laboratory diagnostics and services. As the regional headquarters for the EMEA region, Synopsys Europe is active in co-operation with affiliates and distributors across Europe, The Middle East and Africa. Clear goals combined with targeted research and development results in tailor-made products. Our customers are our guides and, in dialogue with them, we create solutions across the three key areas – in the lab, at the clinical and at the patient. For more information, visit us on stand nr. 86 or can be found at www.synopsys-europe.com.
